

## Polish Women Are Taking On Many Dangerous Missions in Participating With Underground

A LOVELY, desperate journey through a dark forest, a dangerous mission on a train under the watchful eyes of the Gestapo, teaching in a hidden school, circulating an underground paper: these are some of the tasks of Polish women today. But Polish women had to fight to get the privileges of participating in the Underground effort, according to the Polish Review.

At first, old prejudices and doubts that women could be trusted with important secrets, that they broke down more easily than men under torture, had to be dispelled. The part they play in the Underground work, however, has proved their worth. Not only are they active in all phases of the fight, but are even able to perform certain duties better than men.

Conduct operations in perhaps the greatest field taken over by women soldiers. At present, communications between the high command and units of the Home Army is maintained with great difficulty. The arbitrary internal frontiers set up by the Germans between the various parts of Poland, the complete absence of automobiles and buses, the heavily guarded railroads make communication and liaison work particularly difficult.

Great physical endurance, moral strength and a sense of duty and loyalty is demanded in work of this kind. Night after night, women couriers travel on foot by dangerous paths, hurrying to their objectives, following the tracks, sliding over wet leaves, falling into wet holes. In the freezing winter, they have to wear Polish autumn, and now in the heat of summer, their courage is not lessened by the fact that they are alone.

Poland is connected by hundreds of invisible ties with the outside world, the heart of which is London. Orders, reports, information, money, supplies stream in and out through the kind of spyglass channels. When, after victory, the full story of Polish Underground missions is written, the world will be amazed at what Polish women have achieved.

## A Portable Bridge

Was Used With Success In The Helms Campaign

Details of another Allied secret weapon, a portable bridge, were revealed after Gen. Sir Bernard Montgomery credited it with much of the success of the Tunisian Sicilian Italian campaigns. The British bridge, named after its inventor, Colonel Coleman Bailey, ministry of supply worker who designed it to cross an envelope, fit together like a big saw puzzle. But it is so simple any group of soldiers, with the aid of a handbook, can fit it together.

Each section of the bridge is 16 feet long, made of 17 light steel beams, the heaviest of which can be handled by six men. As the parts are fitted together they are pushed on rollers until the gap is bridged.

The bridge can cross any gap up to 240 feet without the aid of pontoons. With personnel the stretch is almost limitless.

A Bailey bridge which British engineers threw across a 300-foot gap in the Tigris river in Italy in 36 hours was called one of the most remarkable achievements in the history of military engineering.

The bridge, now being used in France, has achieved other other types of bridge failed to support the increased weight of new tanks.

## A Close Call On The Normandy Front

## Glad To Be Liberated

But Many French People Cannot See Their Real Freedom

Readers may have been puzzled by the reports from the strip of liberated Normandy about the attitude of the French people towards the unconditional orders of the past 18 days.

Some correspondents have told us of a changed attitude of opinion, of men and women weeping in their gratitude for their deliverance. Others have reported that people smile and apathetic, and have sent disturbing stories of French women selling as enemies for the Germans and killing Allied soldiers. General de Gaulle has said that there is an enthusiastic reception as the symbols of French liberty.

The French people are very grateful to be free, but they are also very aware of the fact that they are still in a state of confusion and uncertainty. They are not yet fully aware of the meaning of their liberation, and they are still in a state of confusion and uncertainty.

## Increasing Trade

Discussions Between Spain, Britain And United States This Place

Reynolds, chief British negotiator to the British ministry of economic warfare, disclosed in the House of Commons that discussions were progressing between Britain, Britain and the United States toward the possibility of increasing trade between the three countries.

Port, asserted emphatically there was an question compensating Spain or Portugal in return for the delivery of molasses exports to Germany. The right side of the left is more developed than the left is 94 per cent of human beings.

## Simple Precautions

Many Ways To Avoid Death On Injury From Lightning

Lightning—man's fury against nature—will continue to cause death, injury and property damage, but its death and injury toll would be greatly reduced if every one took some simple precautions.

First and most important safety measure is to get under a shelter as quickly as possible the instant a storm comes up. Houses, barns and other buildings—except the bell-tower—good shelter, but trees are not.

Records show that many of the losses of lightning deaths that occur each year in the nation would be avoided if gutters and lightning rods were as soon as they are of storm approaching instead of waiting for it to blow over.

If you are riding along in a stalled sedan when an electric storm develops, stay in the car. It's a safe place to be, as far as lightning is concerned. Dr. Gilbert D. McCann, Westinghouse lightning expert, considers that to be about as safe as you can get.

Keep away from wire fences, wires of all types, metal objects and pipes during a storm. These metallic objects can and often do conduct electricity through their great length, endangering the person touching them.

Stand clear of stoves and pipes in the kitchen or cellar, and shut the chimney and fireplace. Stay away from windows or doors, particularly if either is open. Choose a place near the middle of the room.

In large buildings and modern homes the danger of being hit by lightning is slight. Thunderbolt strikes hundreds of such structures every year, but seldom kills. The occupants, the tops and sides of buildings usually provide a good path for the lightning's discharge.

## Canadian Forests Have Made A Most Important Contribution To Strength Of United Nations

CANADIAN forests have made a vital contribution to the strength of the United Nations, say military experts. Hundreds of millions of board feet of Canadian lumber have gone into the construction of planes, ships, paper and training facilities.

Cellulose is situated into a machine gun powder, and every conceivable kind of material that British warships is produced in the Dominion from Canadian wood. Wood, plastics and cellulose are the basic materials of electrical apparatus, in radio, parts for land and sea mines and submarine detectors.

Pulpwood has gone to the front to shell, in thousands of packages for the safe delivery of food, delicate instruments, clothing, gas masks, medical kits and many other necessities of the Canadian fighters.

According to authorities, Canada and Newfoundland are the chief exporters of wood pulp and newsprint in the world. The Dominion is also a very great exporter, the United Kingdom and United States as well as other allied nations are dependent on Canadian supply.

# DEMOCRACY IN BUSINESS

The co-operative movement is democracy in business. As it depends on human agencies to conduct it, it can never be perfect, but it is a long way ahead of the capital stock company and the modern trust corporation.

Co-operation does not exist in law or in formula. It exists in the minds and hearts and purposes of the people. It is founded on mutual confidence and trust. With the development of these ideals people can make a success of co-operation.

The Alberta Wheat Pool is a creation of the farmers of this province. It has demonstrated its efficiency as a business organization and also its adherence to the co-operative principles. To make it a greater success than ever, it needs the interest and support of a greater number of the farm people of this province.
